

Depue Residents Medical History Survey

This survey intends to find if a medical connection exists between past and present Depue residents and workers and the water and soil contamination present in that town. All information will be used solely to compare medical conditions to national averages. Please fill this out to the best of your knowledge, and return to the Depue HS Student Environmental Group, or the City of Depue.

1. Have any family members who have ever lived or worked in Depue been diagnosed with cancer? If yes, what type of cancer, and where did they receive medical attention?
